SUBJECT INDEX

Acetylcholine receptors, effects of organophosphorus compounds and oximes, **11,** 559
Acipimox-digoxin interaction, lack of, in patient volunteers, **11,** 357
Acute poisoning, a pattern of, in children in urban Zimbabwe: ten years' experience, **11,** 335
Alcohol, in cerebrospinal fluid (CSF) and alcoholism, **11,** 237
Aldrin and dieldrin residues, in human fat, milk and blood serum collected from Delhi, **11,** 43
Aluminium, uptake of, by tea drinkers, **11,** 586
Amiodarone and chloroquine, failure of activated charcoal to accelerate the elimination of, **11,** 491
Amitryptyline, determination of, in the hair of psychiatric patients, **11,** 363
Amitryptyline and combined amitryptyline/chlordiazepoxide overdose, clinical course, therapy, outcome and analytical data in, **11,** 458
***trans*-Anethole**, induction of Cytochrome P450 and related enzyme activities following dietary administration of, **11,** 580
Antimony compounds, pentavalent, subacute toxicity of, in rats, **11,** 283
Arsenic-copper interaction, in the kidney of the rat, **11,** 315

Brassica vegetable consumption, effect of, on caffeine metabolism, in humans, **11,** 167
2-Bromoethanimine, and correlation of nephrotoxicity with mutagenicity, **11,** 588
Busulphan, studies of haematological parameters in the mouse using the Technicon H*1 haematological system, **11,** 583

Cadmium acetate instillations, single intratracheal, in rats, changes in antioxidant lung protection after, **11,** 217
Carbaryl intoxication, a case of porphyria due to, **11,** 373
Carbon tetrachloride, increased hepatotoxicity of, as a result of liver taurine depletion by ß-alanine, **11,** 579
Cell proliferation, carcinogenesis of a high rate of, **11,** 437
Chlorinated hydrocarbons, acute toxicity of, in rats given via the intratracheal route, **11,** 173
Chlorine, copper and nitrite, interactive effect of, on methaemoglobin formation in red blood cells of Dorset sheep, **11,** 223
Chloroquine absorption, prevention of, by activated charcoal, **11,** 117
Cholinesterases
and biological effect monitoring of organophosphorus pesticide exposure, **11,** 557
reactivation and ageing of, **11,** 555
Chromium, hexavalent
sex hormones and epididymal sperm parameters in rats following treatment with, **11,** 255
sex hormones and semen quality in welders exposed to, **11,** 259
Chromium compounds, soluble, induction of DNA strand breaks in peripheral lymphocytes by, **11,** 77
Chronic animal toxicity studies, an international appraisal of the minimum duration of, **11,** 155
Chrysene and methylchrysene, interaction with cytochrome P450, **11,** 575
Cigarette smoke, inhibits cytosolic, but not microsomal, epoxide hydrolase of human lung, **11,** 99
Cinnamaldhyde, glutathione conjugation in the metabolism of, **11,** 576
Cinnamic acid, cytotoxicity and glutathione depletion in hepatocytes by esters of, **11,** 589
Colchinine, toxicokinetics of: analysis of tissue, plasma and urine data in ten humans, **11,** 510
Corticosterone, reproductive toxicity of, **11,** 505
Cyanide poisoning, fatal, from cassava-based meal, **11,** 47

Deltamethrin, the voltage-gated chloride channel as a novel site of action for, **11,** 572
Detergents, household, dangerous mixture of, in an old-style toilet: a case report with simulation experiments of the working environment and warning of potential hazard relevant to the general environment, **11,** 27

Dichloromethane, double fatal inhalation of, **11,** 540
Diethyl phthalate, percutaneous absorption of, **11,** 585
Difenacoum poisoning, as a cause of haematuria, **11,** 553
Diquat, intestinal secretion induced by, **11,** 524
DNA fingerprinting, genetic variation in outbred rats estimated from, **11,** 590
Dose selection, for toxicity studies, a protocol for determining the maximum repeatable dose, **11,** 449
8-OH-DPAT, metabolism of, **11,** 578
Drug interaction, between rifampicin, isoniazid and contrimoxazole in rabbits, **11,** 105
Dyes, textile, chromosomal aberrations and sister-chromatid exchange frequencies in workers occupationally exposed to, **11,** 275

Ear, inner, normal and pathological anatomy and function of, **11,** 564
Ecotoxicology, role of, in the assessment of human exposure to chemical substances, **11,** 307
Elapidae bites, clinical features and treatment of: report of three cases, **11,** 135
Erratum, to Biological and biological-effect monitoring of workers exposed to 4,4′-methylene *bis*(2-chloroaniline), **11**(3), 1992, **11,** 592
Eye
anatomy and function of, **11,** 563
clinical methods for the evaluation of toxic injury to, **11,** 566

Fenfluramine poisoning, fatal self-toxicological findings after, **11,** 51
Fluazifop-butyl, pharmacokinetics of, in human volunteers II: dermal dosing, **11,** 247

Gentamicin and frusemide, administration in combination causing differential effects on the inner and outer hair cell function, **11,** 588
Glutathione *S*-transferases, characterization of rat olfactory epithelium, **11,** 574
Glycol ethers, effects of, on plasma osmolality, **11,** 488

Heavy metals, determination of, in human liver, **11,** 311
Hepatocytes, cryospreserved rat culture of, use for toxicology *in vitro*, **11,** 575
Heroin, and pyrithyldione, fatal intoxication due to the combined use of, **11,** 297
Hexachlorobenzene, sulphur derivative of, in human urine, **11,** 271
n-Hexane, chronic exposure to, induces changes in nerve-specific marker proteins in the distal peripheral nerve of the rat, **11,** 323
Hydrazine, studies on the disposition and metabolism of, in rats *in vivo*, **11,** 121

Indobufen, stereochemical disposition of, **11,** 578
Indomethacin, and protein binding of methotrexate, **11,** 291
INVITTOX data bank, of *in-vitro* techniques in toxicology, **11,** 151

Lead
effects of, on the blood serum, liver and brain sialoglycoconjugate levels in rats, **11,** 89
elevation of, in human blood from its controlled ingestion of beer, **11,** 3
Lornoxicam absorption, influence of bismuth chalate on, **11,** 59

MbOCA and MDA, comparison of percutaneous absorption of, **11,** 585
Mercuric mercury poisoning, acute: chemical separation of hair mercury shows a peak of inorganic mercury value, **11,** 53
Mercury vapour toxicity
elemental, treatment, and prognosis after acute, intensive exposure in chloralkali plant workers. Part I: history, neuropsychological findings and chelator effects, **11,** 201
elemental, treatment, and prognosis after acute, intensive exposure in chloralkali plant workers. Part II: hyperchloraemia and genitourinary symptoms, **11,** 211
Mesothelioma, induced by the intrapleural administration of fibres, **11,** 530
Metal polishes, respiratory symptoms and ventilatory capacity in, **11,** 466
Methomyl, cardiac toxicity following short-term exposure to, in spraymen and rabbits, **11,** 93
Methotrexate, protein binding of, and indomethacin, **11,** 291
4,4′-Methylene-*bis* (2-chloroaniline),

biological-effect monitoring of workers exposed to, **11,** 229
Molluscicide poisoning, acute, persistence of metaldehyde during, **11,** 361
MPT-IP, containing 60% methylparathion, immunotoxic effects of, in mice, **11,** 11

Nasal cavity, drug metabolism in, relevance to toxicity, **11,** 569
Nitrogen dioxide intoxication
acute
biochemical and histological alterations in rats after, **11,** 189
rat model to investigate the treatment of, **11,** 179
^{1}H-NMR spectroscopy, as a means of monitoring nephrotoxicity as exemplified by studies with cephaloridine, **11,** 35

Olfactory toxicity, **11,** 565
Ophthalmology, toxicological, methodology and applications, **11,** 566
Organophosphate toxicity, in man, inter-individual variations in enzymes controlling, **11,** 109
Organophosphates, interspecies variation in susceptibility to, **11,** 582
Organophosphorus insecticides, treatment of acute poisoning by, **11,** 558
Organophosphorus pesticides
and human health, **11,** 555-561
long-term effects of, **11,** 560
residues of, in foods, **11,** 558
Orthodox medicines (therapeutic drugs) poisoning, aspects of, in urban Zimbabwe, **11,** 329
Ototoxicity
methodology of studies of, in man, **11,** 568
of trimethyltin and triethyl tin, **11,** 569
Ototoxicity, drug, experimental evaluations and basic mechanisms, **11,** 567

Paracetamol-induced fulminant hepatic failure, long-term anticonvulsant therapy worsens outcome in, **11,** 265
Paraquat
effects of concentration and partial replacement of, by diquat, on human toxicity: a clinical survey, **11,** 241
efficacy of whole bowel irrigation in dogs using solutions with or without adsorbent, **11,** 495
neurotoxicity induced by intracerebral and systemic injection of, **11,** 535
Paraquat poisoning, high-dose cyclophosphamide and dexamethasone in: a prospective studt, **11,** 129
Pentachlorophenol exposure, assessment of, in humans, using the clearance concept, **11,** 17
Pentazocine, cardiotoxicity of, **11,** 573
Peripheral sensation, **11,** 565
Peroxisome proliferators, effects of joint exposure to selected, on hepatic acyl-CoA oxidase activity in male B6C3F$_1$ mice, **11,** 83
Pesticide-related incidents, treated in Finnish hospitals: a review of cases registered over a 5-year period, **11,** 473
Phenoxypropanoate herbicide, absorption and metabolism of, **11,** 577
Phenylpropanolamine, a case study of affective psychosis after routine use of proprietary cold remedy containing, **11,** 295
Podophyllotoxin intoxication, toxic effect of Bajiaolian in hermal therapeutics, **11,** 480
Preclinical drug testing requirements: a clinical scientist's view of, **11,** 145
Proceedings of the British Toxicology Society, Royal College of Physicians, Edinburgh, 18-20 September 1991, **11,** 379
Pyrethoids, synthetic, effects of, on cutaneous sensation, **11,** 570
Pyrithyldione, and heroin, fatal intoxication due to the combined use of, **11,** 297

Quinine, effects of, on cochlear function in the guinea pig, **11,** 571

Radiotoxicity, differences in, of two platinum isotope cells *in vitro*: can they be ascribed to different handling by the cells?, **11,** 163
Retinal damage, mechanisms of, **11,** 568
Retinoids, correlation of comparative teratogenicity of, **11,** 581

Safety warnings and first aid instructions, adequacy of, on consumer and pharmaceutical products in Nigeria, **11,** 546
Salicylate, effects of, on cochlear nerve fibres in the guinea pig, **11,** 571
Satellite symposium of the Eurotox '91 Congress on Safety Aspects of Biotechnology-derived Drugs, conclusions of, **11,** 369
Sensory systems, a perspective of the

toxicology of, **11,** 442
Smoking, individual differences in activity of glutathione peroxidase and catalase studied in monozygotic twins discirdant for, **11,** 341
Snake bites, clinical experience of the therapy of, **11,** 549
Sodium nitrite, chronic low-dose exposure in VM-strain mice: central nervous system changes, **11,** 279
Soman, neuropathology induced by, **11,** 517
Sudden infant death syndrome (SIDS) and the toxic gas hypothesis: microbiological studies of cot mattresses, **11,** 347
Sulphadimidine, carcinogenicity of, **11,** 60
Toxic gas hypothesis, and the sudden infant death syndrome (SIDS): microbiological studies of cot mattresses, **11,** 347
Triamterine, ocular bioavailability of, **11,** 584
Triazolam overdose, anterograde amnesia in, despite flumazenil treatment: a case study, **11,** 289
Tributyltin oxide (TBTO), immunotoxicity of, does not increase the susceptibility of rats to experimental respiratory infection, **11,** 71
Trichloroethylene, and frequency selective hearing loss, **11,** 587

Xenobiotics, analysis of the immunotoxic effects of, **11,** 65
